SUMMARY

Founding Engineer with equity and the technical owner of a multi-tenant B2B SaaS product, responsible for the whole stack and for production: architecture, backend, web app, admin consoles, AWS infrastructure, releases and security. Primary engineer across the platform's three production repositories. Led the company's SOC 2 and GDPR compliance and worked directly with enterprise customers through onboarding and security review. Also built three products on the side. AWS Certified Cloud Practitioner.

EXPERIENCE

Mentorgain — Founding Engineer

May 2025 – Present

TypeScript / NestJS / React / PostgreSQL / AWS — Remote

Mentorgain is a multi-tenant B2B SaaS platform that enterprises use to run mentoring programmes end to end: matching, calendar-synced sessions, goals and skill growth, and outcome reporting for HR.

- **Own the platform end to end.** Sole/primary engineer across the backend, the mentor and mentee web app and the admin consoles — architecture, data model, delivery, code review and production support, with feature flags for safe rollout and tests on critical integrations.
- **Own production and cloud.** All AWS infrastructure (RDS, S3, SES, SNS, IAM), deployments, staging and production configuration, and the account-wide security remediation plan from a full audit.
- **Led SOC 2 and GDPR compliance** as the technical lead: PostgreSQL Row-Level Security on every multi-tenant table, CASL role-based access control, data-privacy controls, sub-processor and data-processing documentation, and audit tooling.
- **Built the core product** — mentor–mentee matching on Elasticsearch, session booking with calendar sync, goals and tasks, session feedback, Skills & Impact analytics, Multi-Program support, Direct Booking, Badges & Achievements, an org-wide Community feed and Extra-Hours approvals.
- **Built the notification and integration layer** — self-hosted Novu behind an orchestrator serving ~200 call sites over email, SMS, Slack and Teams; Microsoft Entra ID SSO and Graph; Google and Microsoft calendars; Rippling HRIS sync; New Relic APM; OpenAI-driven analytics.
- **Work directly with enterprise customers.** Ran technical onboarding for international clients, answered security and vendor-risk questionnaires, and shipped the customer-specific work that unblocked them — including Microsoft SSO and Teams for a global media client.

PROJECTS

Relay — supervised multi-agent AI platform — Live · API · Video

- **LangGraph.js supervisor workflow** (NestJS, PostgreSQL, React): parallel research and CRM agents over MCP, a resolver–critic loop, guardrails and a human-review interrupt, with every step checkpointed for crash recovery and time-travel replay. Hybrid RAG (pgvector, re-ranking) plus GraphRAG on Apache AGE; model routing across Gemini, Groq, OpenAI and Claude with fallback.
- **Evaluated and integrated:** LLM-as-judge evals (groundedness, relevance) gated in CI with Evalite, online evals with confidence calibration; ships as an MCP server and n8n nodes, deployed to AWS.

Upmarket — enterprise-readiness API for B2B SaaS — Live · API · Video

- **SAML 2.0 / OIDC SSO, SCIM 2.0 directory sync**, tamper-evident audit logs and Zanzibar-style authorization (NestJS, PostgreSQL, Keycloak); OpenAPI 3.1 docs from zod schemas; keyless CI/CD to AWS via GitHub OIDC and SSM.
- **Secure by design:** SAML replay protection, OIDC with PKCE, hashed keys and codes; e2e tests against Keycloak in CI.

Vouch — security-questionnaire and SOC 2 evidence automation — Live · Video

- **Drafts cited answers to security questionnaires** with pgvector search and Gemini, written back into the customer's workbook; 22 automated SOC 2 checks on AWS and GitHub in a hash-chained log; NDA-gated trust center.
- **Grounded AI:** only verified citations count; confidence drops on stale sources or failing checks; golden-set eval in CI.

SKILLS

INTEGRATIONS: Microsoft Entra ID SSO, Microsoft Graph, Microsoft Teams, Slack, AWS SNS (SMS), AWS SES (email), Novu, Rippling HRIS, Google Calendar, New Relic, OpenAI, Google Gemini, OAuth 2.0

AI & AGENTS: LangGraph, LangChain, MCP, RAG / GraphRAG, pgvector, n8n

LANGUAGES: TypeScript, JavaScript, C++, SQL

BACKEND: NestJS, Node.js, Express, REST APIs, PostgreSQL (RLS), MongoDB, Elasticsearch, Redis, Sequelize, Atlas migrations

FRONTEND: React, Next.js, Redux, Tailwind CSS, SCSS, Bootstrap, Framer Motion

CLOUD & DEVOPS: AWS (RDS, S3, EC2, SES, SNS, IAM, CloudTrail), Nx monorepo, Docker, CI/CD, Git / GitHub / Bitbucket

SECURITY & IDENTITY: SOC 2, GDPR, SAML 2.0, OIDC, SCIM 2.0, RBAC / CASL, Row-Level Security

PRACTICES: Multi-tenant SaaS architecture, database design, feature flagging, testing (Vitest, Playwright), Agile / Jira

EDUCATION & CERTIFICATIONS

B.Tech in Computer Science — Vellore Institute of Technology (CGPA 8.57)

Aug 2021 – Aug 2025

Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, OOP — Vellore, India

AWS Certified Cloud Practitioner

Jan 2024
